

# Abrasive Sponge Balls

## Available Sizes

- 1/2"-2"Ø (12.7mm - 50.8mm Ø)
- Custom sizes available

## Propulsion Method

- Water or air gun at 90PSI
- Use with booster pump for heavier deposits

## Unique Features

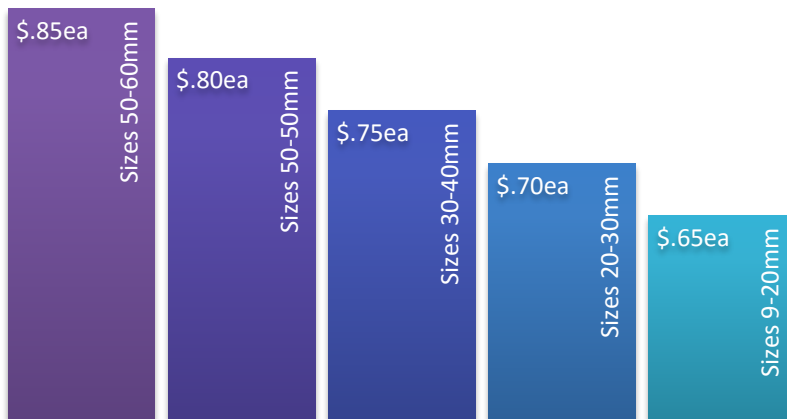

- Various densities and sizes available
- Corborundum coating

## Application

- Removes soft deposits such as mud and slime, bio-fouling, and smaller obstructions
- Great for sleeved and heavily epoxied tubes

## Benefits

- Various ball densities and sizes available to match application and fouling
- Cleans virtually any size tubing
- Abrasive coating adds additional tube polishing value
